

Facebook and Fake News

Consider each of the below proposals, and fill in each of the below TODOs.

Proposals

Proposal 1

Facebook relies on an algorithm as well as individual users' reports to identify content that is potentially "fake news." Once the content has been identified, it is sent to third party fact-checkers for verification. If the content is verified as fake news, it is publicly flagged with a warning that the content is disputed by fact-checkers.

Proposal 2

However, a designer at Facebook believes that there needs to be a different approach to content regulation. Their proposal is that content deemed problematic by third-party fact-checkers should be prevented from being shared on the platform altogether.

Questions

1. Which form of content regulation, Proposal 1 or Proposal 2, do you feel is better? Why?
 - a. Proposal 2 , because i think can prevent from distribute on the internet and its better than you pay attention to a person for be caferfull
